EDUCATION

Lovely Professional University — Punjab, India

B.Tech in Computer Science & Engineering — Specialization in Data Science with Machine Learning (in collaboration with upGrad)

CGPA: 8.96/10 | Expected Graduation: July 2029 | Currently: 2nd Year, 3rd Semester

TECHNICAL SKILLS

Languages: C++, Python, Java

Libraries & Frameworks: Pandas, NumPy, Matplotlib, Seaborn, TensorFlow, Scikit-learn

Tools & Platforms: Git, MySQL, PostgreSQL, Power BI, VS Code

Core Concepts: Data Structures & Algorithms, Object-Oriented Programming, Database Management Systems

PROJECTS

Pure Python Data Cleaning Recommendation Engine

Python, Data Preprocessing, CSV Processing, Recommendation Logic

- Built a pure-Python recommendation engine that analyzes dataset characteristics and suggests targeted data-cleaning strategies without relying on external ML libraries.
- Implemented automated data quality assessment covering missing values, duplicate records, inconsistent formatting, and outlier detection.
- Designed modular components for missing-value handling recommendations, duplicate detection, and outlier identification support, making the tool extensible to new datasets.

Credit Banking Customer Analysis

Python, Pandas, NumPy, Matplotlib, Seaborn, Exploratory Data Analysis

- Performed end-to-end exploratory data analysis on banking customer data to uncover behavioral patterns and financial trends.
- Built visualizations using Matplotlib and Seaborn to translate raw transactional data into actionable business insights.
- Derived customer segmentation insights to support targeted financial analysis and decision-making.

CERTIFICATIONS & WORKSHOPS

- Power BI — Workshop Certification, upGrad
- Web Scraping — Workshop Certification, upGrad

ADDITIONAL INFORMATION

- Actively maintaining a structured Data Structures & Algorithms repository in C++ on GitHub, organized by topic with working code examples (Striver's A2Z DSA Sheet).
- Building and iterating on a personal AI-powered portfolio website integrating a custom chatbot.
- Exploring the stock market and value-investing principles from first principles as a self-directed learning project.
